

# G6B Bi-Angular Home Gym

## Body-Solid

## G6B

*Rated a Consumer Magazine's  
Best Buy...*

- Patented Bi-Angular® converging press station replicates a free weight dumbbell press and produces 25% more muscle interaction.
- Chest, incline, shoulder press and leg developer stations incorporate the friction free Smooth Glide Bearing System™.
- Self-aligning, contoured leg extension cuffs automatically adjust throughout exercise movement.
- Integrated leg developer CAM prevents resistance drop-off at the end of the exercise movement and provides consistent resistance throughout full range of motion.
- 95kg selectorised weight stack. Optional 118kg weight stack available.
- High-density, top grade DuraFirm™ pads with lumbar support provide ultimate comfort and prevent lower back strain.
- Telescoping, chrome plated, gas-assist adjustable seat post for quick, smooth adjustment and proper body positioning.
- Flip-up seated row foot brace plate stabilizes your body when using heavy resistance.
- 1000kg tension strength, military spec, steel aircraft cables with swivelling ends provide durability and low maintenance.
- 110mm pulleys are impact resistant fiberglass reinforced nylon with precision machined steel ball bearings.
- 50mm x 75mm, 11-gauge mainframe construction assures maximum strength, function and durability.
- Tough, durable, electrostatically applied powder coat finish.
- Easy to use, space saving, no-cable-change design.
- Includes revolving lat bar, revolving straight bar, ankle strap, ab / triceps strap, Total Body Workout™ DVD, full size exercise chart and convenient water bottle and towel holder.
